

I am writing to urge you to reject the NAB's petition 04-160. It is about time the NAB start cleaning up the broadcasters act instead of trying to put down anything they deem threatening to their existance. If people are tuning away from their broadcasts, it is because they are not providing what the people want to hear. Then it is time for them to improve, not try to put down any thing better that comes along.

Broadcasters such as XM and Serius are providing excellent services for the public. AND the public is paying for this service, thus you have no right to regulate what they can broadcast. This is a pay-per-listen service! You do not regulate pay-per-view television!
